Recent research clearly indicates that homophobia, transphobia and gender-based harassment are amongst the major factors behind bullying in schools and are harmful to all students. Studies show that manifestations of homophobia and transphobia still pass unnoticed by many adults working with youth.

Homophobia, transphobia and gender-based harassment hurt all youth, including:

- Youth who identify as **LGBT** or who are questioning their **sexual orientation** or **gender identity**;
- Youth from families with **LGBT parents**;
- Youth with other **LGBT family members** or **friends**;
- Youth with interests that don't conform to **gender stereotypes**;
- Youth who restrict their **actions** and their **words** because they are afraid of **being labelled** as an LGBT person.
